CHAMFER CUTTERS

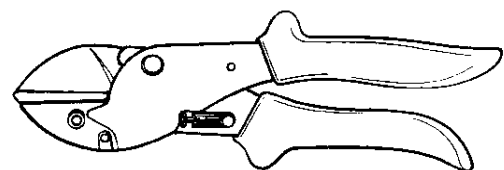

For quick, clean cuts in wood moldings, try these chrome steel Chamfer Cutters. The hardened steel blade slices through most soft woods with ease. But as sharp as the blade is, the real secret behind the cutter's prowess is its ingenious anvil. The anvil acts like a chopping block, supporting the chamfer as the blade passes through it. No bypass shear works as effortlessly or cuts as true. A built-in fence to either side of the blade assures perfect 45° miters every time.

Cutters lock tight for safe carrying and can be quickly disassembled for sharpening. This precision crafted, pocket sized wonder belongs in every contractor's belt.

SHEFFIELD CHAMFER CUTTERS

- Heavy duty universal shears
- Replacement blade available
- Replacement anvil available
